Inspect/Update Current Inventory:	No

GO Series Software update 18.3

We are pleased to announce the release of new software for Simrad® GO series multifunction displays.

The new software is available from the Simrad-yachting website and via direct download to the GO unit when connected to the internet.

This release for the GO series has a subset of the 18.3 features that will be released for NSS evo2, NSS evo3, NSO evo2 and NSO evo3.

New Features

Active Imaging™ support

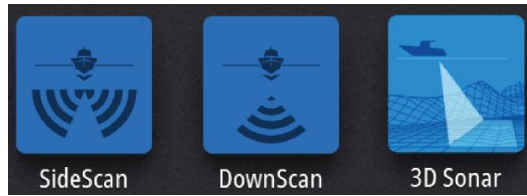

This release provides support for the new Active Imaging™ 3-in-1 and 2-in-1 transducers. The following Active Imaging™ transducers can be connected to GO series displays:

- Active Imaging 3-in-1 transducer – (CHIRP, SideScan and DownScan Imaging™)
- Active Imaging 2-in-1 transducer – (SideScan and DownScan Imaging™).

User interface improvements

New DownScan, SideScan and 3D Sonar icons on home page

The SideScan, DownScan Imaging™, and 3D Sonar icons replace the StructureScan icon on the home screen.

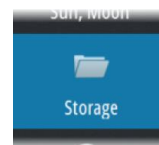

Application menu changes

To simplify the user experience, echo sounder applications and the chart application menus have changed. Submenu options are moved to the new "More options" submenu and the "View" main menu option has been removed.

Tool panel change

The tool panel option "Files" is renamed "Storage".

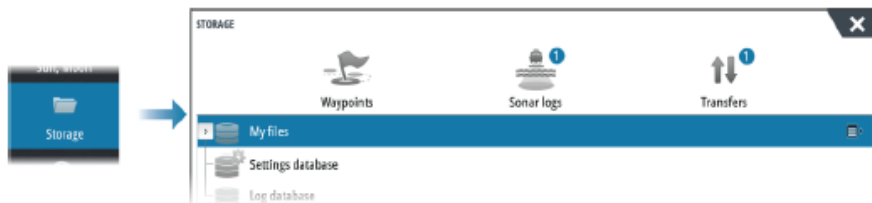

Upload sonar logs to C-MAP® Genesis

It is now easier to upload Sonar Logs to C-MAP Genesis. Log in to your C-MAP Account from the Services menu.

There are new easy access buttons under the "Storage" tool (Files) to control the upload and transfer of sonar logs.
